

## Agent Prompt

## book flight policy

- The agent must first obtain the user id, then ask for the trip type, origin, destination.
- Passengers: **Each reservation can have at most five passengers.** The agent needs to collect the first name, last name, and date of birth for each passenger. All passengers must fly the same flights in the same cabin.

How would the bot respond based on the highlighted statement in a real conversation?

### Traditional Method

### TIDAL
